

## Experience

---

<b>Web Developer Support</b>	<b>Apyrse formerly PDFTron</b>	<b>April 2022 – PRESENT</b>
------------------------------	--------------------------------	-----------------------------

- Analyze and debug customer application source code utilizing Apyrse SDK to diagnose and address any mistakes in design or implementation. (90% JavaScript ES6).
- Follow modern web standards in HTML, CSS, JavaScript when providing solutions to clients as well as internal support.
- Develop features & provide bug-fixes to maintain product competition as part of the agile process.

<b>Web Developer</b>	<b>Net2Net IT Solutions</b>	<b>October 2021 – April 2022</b>
----------------------	-----------------------------	----------------------------------

- Design and develop frontend user interfaces primarily in booking, contact-us, and other complex pages for multiple clients serving thousands of users. (Razor with ASP.NET Core MVC)
- Engineered unique banners, forms, the design and feel to replicate client websites for smooth page transition. (HTML, CSS, JavaScript, jQuery)
- Manage and update database resource strings in all environments (DEV/QA/PROD) with up-to-date client change requests. (SSMS – T-SQL)
- Resolve client specific requests directly through the admin portal of WordPress, SquareSpace, and complex solutions with NopCommerce solutions integrated with Peak15 Travel API.

<b>Technology Analyst</b>	<b>Region of Peel</b>	<b>March 2021 – October 2021</b>
---------------------------	-----------------------	----------------------------------

- Monitor and regulate 50+ staff members' technical equipment daily via hardware and software support (COVax – Salesforce CRM)
- Expedited solutions to clinic staff in the form of account management, file/folder access, GPO/Certification and VPN/network issues.
- Diagnose and troubleshoot network issues providing 100% uptime to minimize wait time. (Command Prompt, PowerShell).
